

A man with a beard and a dark t-shirt stands on the left, presenting to a group of people seated at long tables in a modern meeting room. The room has a high ceiling with exposed ductwork and modern lighting. The people are engaged, some looking at laptops. The text 'ALL YOUR POSSIBLE FUTURES WORKSHOP' is overlaid in large yellow letters.

# ALL YOUR POSSIBLE FUTURES WORKSHOP

VIVID FUTURE SCENARIOS FOR  
BETTER CONVERSATIONS IN THE PRESENT

**All Your Possible Future Workshop** bridges the gap between today's trends and tomorrow's possibilities? By analyzing the signals of change in our environment, we can create vivid scenarios that not only spark imagination but also guide practical action. These scenarios empower teams to think critically, challenge assumptions, and explore innovative solutions tailored to an ever-evolving world.

### **WHO IS THIS FOR**

---

This workshop is perfect for both organisational and industry events, as well as team days and leadership off-sites. Whether you're shaping long-term strategy or exploring new possibilities, 'All Your Possible Futures' will spark fresh thinking and equip your team to navigate uncertainty with confidence.

### **WHY START NOW**

---

Although each of the scenarios are set 10 years into the future they explore topics that are already unfolding and leaders are already making decisions about. For organisations who want to move towards a more considered and proactive approach there is no better time to explore All Your Possible Futures than right now.

The session can be run as a stand alone two hour or half day workshop/masterclass. It can also be combined with a keynote and additional content to form a more substantive full day event. We encourage you to get in touch to discuss the journey you'd like to take participants on and the insights you're hoping to uncover, we can then assist in shaping the content towards your desired outcome.

## WHY THIS WORKSHOP

All Your Possible Futures was developed for clients who want to tap into the power of future scenarios but aren't in a position to invest the time or resources required to develop a set of fully custom scenarios. Instead these 'off the shelf' scenarios have been crafted in collaboration with an experienced business storyteller to explore some of the most common 'critical uncertainties' that organisations are facing.

Through the power of story these scenarios overcome many of the challenges organisations face when discussing significant change. First, the use of narrative makes it easier for non-experts to engage and explore what might otherwise be complex and challenging topics. Second, setting these scenarios in the future removes much of the conflict and perception of threat that might otherwise hold people back.

Whether it be for a board, leadership team, department or industry groups, All Your Possible Futures provides a facilitated and engaging approach to exploring some of the most important shifts organisations will be required to navigate.

## WORKSHOP OUTCOMES

### SPOT PATTERNS IN UNCERTAINTY

Anticipate change and make more informed decisions.

### LEAD WITH CONFIDENCE

Understand the leadership skills required in uncertainty.

### STRENGTHEN TEAM COHESION

Foster trust, adaptability, and collective problem-solving.

### ACT WITH CONFIDENCE

Develop practical tools and mindset shifts to navigate complexity.

## VIVID FUTURE SCENARIOS FOR BETTER CONVERSATIONS IN THE PRESENT

In a world defined by uncertainty and rapid change it's become increasingly hard to get everyone on the same page. This workshop uses customised stories of the future to build understanding and shape a shared direction for leaders, staff and stakeholders.

All Your Possible Futures' starts with you selecting from a suite of 10 year future scenarios you'd like to explore with your audience. Covering topics such as AI agents, work from anywhere, quantum computing, corporate responsibility, stakeholder activism and cybersecurity these short, vivid and memorable stories of the future have all been crafted to encourage your audiences critical thinking.

After choosing your scenario, we then work together to design a facilitated session that will enable the conversations, uncover the motivations and determine the actions that will move your organisation forward.

More than just a keynote to inspire, or a workshop to teach, this interactive and immersive experience will enable understanding and shape decisions long after the session is over.

**What if the future isn't  
something to predict, but  
something to prepare for?**

## ABOUT SIMON

15 years ago, Simon was one of the founding members of Rio Tinto Iron Ore's internal scenario planning team. The team was tasked with developing long-range scenarios to help the leadership team understand global iron ore demand over 10+ year time horizons. This information was used to guide billion-dollar investment decisions, including the construction of new mines, railroads and port facilities.

Over the last decade, Simon has applied his extensive real world experience in scenario planning and futures thinking to become one of Australia's leading futurists and a sought after conference speaker. Along the way, he has also worked with countless business leaders to address their significant business challenges and make better big decisions.

Simon also recently published his third book 'The Scenario Planning Guide: How scenario planning can be used to align thinking, stimulate ideas and overcome the inertia of uncertainty'.

## TESTIMONIAL

“

Simon thanks for your work, your sessions exceeded my expectations. These are incredibly useful structures and processes.

”

**TONY HALLAM**

DIRECTOR ZOOS VICTORIA

A person is seen from behind, sitting on a sandy beach and looking out at the ocean. The sky is a uniform grey, suggesting an overcast day or dusk. The water is dark with some white foam from waves breaking near the shore. The person is wearing a dark jacket.
